

Audit Manager + vs. Atom Audit

Which Healthcare Auditing Platform Is Right for Your Organization?

At-a-Glance Difference

Audit Manager+

An audit-first platform built by auditors for hands-on execution. Designed for flexibility and customization, it supports full lifecycle audit management—from planning and fieldwork to education and follow-up.

Atom Audit

A structured audit management solution focused on standardized workflows, governance, and documentation. Designed to promote consistency, oversight, and program-wide control across audit initiatives.

Key Distinction

Audit Manager+ offers adaptable, execution-focused auditing tailored to operational needs, while Atom Audit supports governance with a structured, standardized management framework.

How Do Audit Manager+ and Atom Audit Compare on Core Auditing Features?

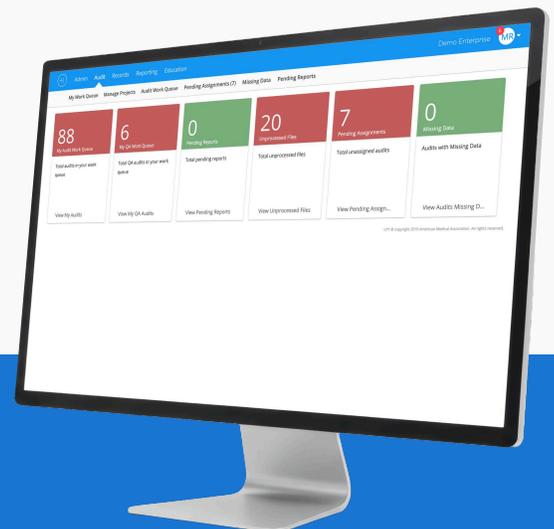

Below is a high-level feature comparison to help illustrate how the platforms differ in approach and capability.

Feature Category	Audit Manager+ (Healthicity)	Atom Audit
Core Focus	Audit-first platform for hands-on execution and flexibility	Structured audit management and documentation workflows
Prospective Auditing	Supports pre-bill and early risk identification	Typically focused on retrospective audits
Custom Checklists	Highly customizable, auto-assigned by risk area	Standardized templates and structured forms
Line-Level Claim Audits	Detailed review of all claim elements	Supports claim reviews with structured audit formats
Methodology Control	Full control over scoring, logic, and audit design	More standardized workflow approaches
Multi-Auditee Support	Audit multiple roles simultaneously	Typically structured around single audit targets
QA Oversight	Built-in quality review and auditor performance visibility	Supports review workflows and audit validation
Reporting	Multi-level reporting from line to enterprise	Audit outcome dashboards and reporting

While both platforms support healthcare auditing, the depth of customization, flexibility, and audit-first design is where key differences often emerge.

Choosing the right audit platform is about aligning technology with how your team works and what risks matter most.

If your goal is to improve audit execution, identify risk earlier, strengthen coding accuracy, and generate actionable insight into performance, Audit Manager+ is designed to support those outcomes across the full audit lifecycle.
