

Compliance Manager vs. SAI360

Which Healthcare Compliance Platform Is Right for Your Organization?

At-a-Glance Difference

Compliance Manager

A healthcare-specific platform designed to manage the day-to-day work of compliance in one connected system. It supports incident tracking, policy management, training administration, risk assessments, and healthcare-specific oversight workflows aligned to how healthcare teams operate.

SAI360

Designed as a broad enterprise governance, risk, and compliance (GRC) platform, offering capabilities across risk, ethics, compliance, and third-party management for organizations across industries.

Key Distinction

The main difference comes down to focus. Compliance Manager is designed for healthcare organizations that need practical, day-to-day compliance program management aligned to healthcare workflows.

SAI360 is built for broader, enterprise-wide governance, offering flexibility across multiple risk and compliance domains but often requiring more configuration and oversight.

Feature Category	Compliance Manager (Healthicity)	SAI360
Core Focus	Healthcare-specific compliance management	Enterprise GRC across industries
Incident Management	Built-in incident reporting, investigation workflows, corrective actions, and lifecycle tracking	Enterprise case and incident management
Risk Assessment	HIPAA risk assessments tied directly to work plans and mitigation	Enterprise risk management and controls
Policy & Document Management	Centralized policy management with version control and attestations	Policy and compliance management tools
Training / LMS	Integrated LMS with healthcare-focused content	Enterprise training and compliance modules
Third-Party / Vendor Oversight	Vendor and business associate tracking with reminders, as well as a Business Associate Risk Survey	Third-party risk management capabilities
Exclusion Monitoring	Automated exclusion monitoring with monthly checks, alerts, and reporting	Not a core native healthcare-focused capability
Reporting & Analytics	Real-time dashboards and reporting for monitoring compliance activity and program performance	Enterprise dashboards and analytics
Industry Focus	Healthcare-specific platform designed for compliance programs	Multi-industry platform
Implementation Timeline	Typically faster	Often longer and more configuration-heavy
Platform Complexity	More streamlined for healthcare compliance teams	Highly configurable enterprise platform
Best Fit	Healthcare organizations managing compliance programs	Enterprises managing broad GRC functions

Why Teams Choose Compliance Manager

Compliance Manager supports the real work of healthcare compliance, bringing incidents, policies, training, and risk assessments into one connected platform designed specifically for healthcare. Instead of adapting a broad enterprise GRC tool, teams get a system aligned to how healthcare compliance programs actually operate, helping reduce complexity, improve visibility, and strengthen program defensibility.
