The Solution:

Compliance Services by Healthicity

Our compliance experts, with decades of industry experience in privacy, security, assessment and consulting, can help your organization protect itself from violations, fines, a soiled reputation and revenue loss. We're here to help you painlessly/easily meet all of your compliance goals, both large and small.

The Problem:

Compliance Violations are a Constant Concern.

Compliance violations are a constant concern for healthcare organizations for a good reason. For FY 2015, the OIG's reported 4,112 exclusions, 925 criminal actions, and 682 civil actions. And resolved 17,694 HIPAA complaints, costing businesses millions. Fines, exclusions, loss of revenue can weigh heavy on healthcare providers. Compliance is crucial for the future of your organization, but it doesn't have to be a burden.

Privacy & Security

Comply with HIPAA and protect your ePHI through rigorous administrative, physical and technical security procedures.

[Learn more on Page 3 >](#)

Assessment & Consulting

Assess your program and get compliance advice and support services from experienced industry professionals.

Privacy & Security

Comply with HIPAA and protect your ePHI with proven, administrative, physical and technical security procedures. Our experts can help your organization build a culture of security and privacy that can withstand an OCR investigation.

VIRTUAL RISK ANALYSIS

Meet Meaningful Use and HIPAA Security made easy. Our convenient virtual risk analysis includes a detailed report, vulnerability scanning and a consultation with one of our security and privacy experts.

ONSITE RISK ANALYSIS

Understand your entire organization's risks, then fix them. This custom analysis includes an onsite visit by one of our experts to diagnose, treat and cure your organization's privacy and security risks.

TRAINING

Ensure that your key-personnel have all of the information they need to maintain your organization's HIPAA compliance. Our web-based training is convenient and affordable.

ADVISORY SERVICES

Any type of analysis or advice related to HIPAA. This can include the creation of a HIPAA compliance program, or the analysis of an existing program.

PENETRATION TESTING

Pen Testing is the evaluation of a computer network's security through attempts to safely exploit vulnerabilities and flaws. Once those weaknesses are detected, the client can then invest in the right areas of IT infrastructure in order to both be HIPAA compliant and avoid being hacked.

HIPAA BUNDLE

Understand your HIPAA risks in three simple steps. This comprehensive approach includes our Virtual Risk Analysis, HIPAA Manager, and online training for privacy and security officials. Achieve HIPAA nirvana.

Assessment & Consulting

Uncertainty, complexity, and limited time or resources can make your compliance efforts difficult and unsuccessful. Strengthen your compliance program and protect your organization from violations by letting industry-leading experts take the heavy lifting and headache out of compliance.

PROGRAM ASSESSMENT

Strengthen your existing compliance program with our high-level virtual review. Let one of our compliance experts review your documentation and provide recommendations for improvement.

COMPLIANCE EFFECTIVENESS REVIEW

Validate or course-correct your program in no time. An in-depth, three day review of your organization's overall structure, policies and procedures, and adherence to compliance guidelines.

ADVISORY SERVICES

Lighten your workload with compliance advice from one of our experts. We can create policies and procedures for you, develop your onboarding process, create HR policies and procedures, or even be there to act as your advisory during government investigations.
