

Training Center

Healthicity has partnered with a new Learning Management System (LMS), Litmos, that will be launching in Q4, 2018. Your new Training Center represents an evolution in the way you can create courses, organize your employees, and report on performance.

New Features

IMPROVED API CONNECTION

Litmos's API connection means that more of your work can be done inside of Compliance Manager, limiting the need to move between applications.

SIMPLIFIED COURSE BUILDING

Use embedded content creation tools that support multiple formats. Course content is added in the form of modules.

UPDATED REPORTING

Review performance and gain insight into training impact with reports and dashboards, or create custom reports delivered via email.

Quickly manage and report on every employee in the new Training Center dashboard.

New Core Courses

Your new Training Center comes with 20 courses covering the compliance spectrum. Additionally, there are more than a thousand new courses available for purchase. For a detailed list of the additional courses, ask your Account Executive or reach out to our Client Success team.
